

Get 10% extra value per litre with FORCE-i

Force-i is an approved distributor of Naf-Tech, a cutting-edge designer product that harnesses the power of Nano Technology.

Achieve a full **100% Return on Investment (ROI)** with just **150ml of Enhancer for every 60 liters** of Petrol/Diesel, and unlock an impressive up to **300% ROI** using our **25 liter Enhancer for every 10,000 liters** of Petrol/Diesel.

Combustion Enhancer

Naf-tech Combustion Enhancer is a South-African product and is a proprietary mixture of hydrocarbons that reduces the surface tension of the fuel when activated. Targeted activation ensures that the product will not alter the distinct characteristics of the base fuel before the physical injection of the fuel takes place.

Improve your fuel vaporisation during injection thereby increasing the burn velocity of the fuel transforming more of the fuel's potential energy into mechanical energy.

Fuel-Line

A new generation product utilising the power of Nano Fuel Technology to interact on a molecular level with your fuel. **The product cleans the vehicles fuel line and improves fuel vaporisation** during injection thereby increasing the burn velocity of the fuel to transform more of your fuel's potential energy into mechanical energy.

Typical Savings

- Improved thermal efficiency of engines.
- Improved power output.
- Cooler combustion temperatures.
- Improved fuel usage.

- Significantly reduced greenhouse gas (GHG) emissions.
- Reduced fuel dilution of engine oil due to unburned fuel slipping past the piston rings.
- Reduced formation of sludge in engine oil due to a reduction in soot.
- Reduced engine wear.

- Transport: **8-12%**
- Power Generation: **11-28%**
- Fisheries: **12-14%**
- Mining and Construction: **11-15%**
- Locomotives and Railroad: **12-15%**

Save money on fuel

Enhance engine thermal efficiency

Contribute to cleaner emissions

Prolong oil and extend engine life

Optimise combustion efficiency
